OBJECTIVE

UI/UX designer who backs design decisions with real user research from survey data to usability testing and turns ambiguous problems into structured flows, scalable systems, and high-fidelity prototypes. Seeking a UI/UX internship to bring that same rigor to real product workflows.

PROJECTS

InspectIQ - Mobile Inspection App + Web Admin Console

Jun - Aug 2026

Role: UI/UX Designer | **Tools:** Figma, Notion, AI tools

Designed an End-to-End inspection ecosystem spanning a mobile app for field inspections and a web admin console for administrators.

Key Contributions:

Mapped the entire inspection lifecycle (pre-inspection – submission – CA - logs) into streamlined mobile flows, backed by workflow analysis of inspections, violations, and corrective actions.

Designed a corrective action lifecycle model with evidence-gated approval and sub-task status rollup to prevent premature sign-off.

Built a 1400px responsive admin console covering dashboards, corrective action center, reports & analytics, user & roles, establishment profiles.

Ran a competitive analysis against FoSCoRIS, SafetyCulture, and GoAudits to benchmark information architecture and flow design.

Delivered a scalable component systems with style guide for consistent brand language.

Outcome: Produced a complete product blueprint with a unified design system spanning both platforms, resolving severity-taxonomy and naming inconsistencies across screens.

Cravly- Community Review-Driven Food Delivery App

Jan- Mar 2026

Role: UI/UX Designer | **Tools:** Figma, AI tools

Reimagined food discovery by prioritizing community trust signals over traditional menu browsing.

Key Contributions:

Defined IA: onboarding – discovery – reviews – cart – payment

Designed a “Taste DNA” and Taste Match system, translated into 6-screen interactive onboarding prototype.

Built a complete visual system and style guide (typography, color, spacing, components, iconography) for a consistent brand language.

Built interaction models for reviews, dish insights, and trust indicators.

Validated the concept with a user survey (n=8) and 5-participant usability test.

Outcome: Reduced cognitive load in food selection workflows and validated an alternative, trust-first discovery model with real user data.

CORE SKILL

UX & Product

- User Research & Insights
- Personas, JTBD & Experience Mapping
- User Flows & Information Architecture
- Interaction & Micro-interaction Design
- Requirements Breakdown & Problem Framing
- Usability Testing

UI & Systems

- Wireframing (Low to High Fidelity)
- Responsive Visual Design
- Component Libraries & Variants
- Auto-Layout, Grids, Design Tokens
- Design Systems (Foundations + Patterns)
- Prototyping (Mobile + Web)

Tools

- Figma, Fig Jam, Miro
- Notion
- ChatGPT, Claude, Gemini, Stitch, Midjourney, AI Plugins
- Basic Illustrator & Vector work

CERTIFICATIONS

- Basics of UI/UX Strategy- UniAthena x Cambridge International Qualifications (UK)
- Figma Bootcamp- LetsUpgrade
- GUVI Workshop: *Designing a digital Payment from Scratch.*

EDUCATION

B.Sc (Hons) Biotechnology
Manipal University Jaipur, Jaipur

2022-2025

ADDITIONAL

- Soft Skills: Communication, Structured thinking, Research documentation, problem solving, Collaboration
- Interests: Design systems, psychology, gamification, mobile-first design.
