OBJECTIVE

Product-minded UI/UX Designer with strong foundations in research, interaction design, and systems thinking. Skilled in translating ambiguous problem spaces into structured flows, components, and high-fidelity prototypes. Seeking a UI/UX internship to apply design thinking, drive clarity in user workflows, and contribute to high-quality digital products.

PROJECTS

InspectIQ- Mobile Inspection App + Web Admin Console

Jan - March 2026

Role: UI/UX Designer | **Tools:** Figma, Notion, AI tools

Designed an End-to-End inspection ecosystem for field officers and administrators.

Impact: Reduced task complexity through clarified flows and scalable system patterns.

Key Contributions:

- Mapped the entire inspection lifecycle (pre-inspection- submission- CA- logs) into streamlined mobile flows.
- Conducted workflow analysis for inspections, violations, corrective actions.

Built a complete 1400px responsive admin console with dashboards, CA center, Reports & Analytics, user & roles, establishments.

- Delivered high-fidelity prototypes and scalable component system.

Outcome: Produced a complete product blueprint with 120+ high-fidelity frames across mobile & web.

Cravly- Community Review-Driven Food Delivery App

Nov - Dec 2025

Role: UI/UX Designer | **Tools:** Figma, AI tools

Reimagined food discovery by prioritizing community trust signals over traditional menu browsing.

Key Contributions:

- Defined IA: Onboarding- discovery- reviews- cart- payment

Designed a modern, community-first visual system and crafted a consistent visual language for clarity.

- Built interaction models for reviews, dish insights and trust indicators.
- Produced hi-fi screens, IA diagrams and prototypes.

Outcome: Reduced cognitive load in food selection workflows and introduced an alternative discovery model.

PastelPaw- Virtual Pet Companion Productivity App

Sep - Oct 2025

Role: Product Designer | **Tools:** Figma, AI tools

Gamified task management through an emotionally engaging virtual pet companion.

Key Contributions:

- Built user flows for task creation, streak management, rewards.
- Designed calm pastel visuals & mascot interaction patterns.
- Developed wireframes of Hi-fi prototypes with animations.
- Designer micro-rewards to increase task completion motivation.

Outcome: Concept improved engagement through positive reinforcement and low-friction task flows.

CORE SKILL

UX & Product

- User Research & Insights
- Personas, JTBD & Experience Mapping
- User Flows & Information Architecture
- Interaction Design & Micro-interaction Logic
- Requirements Breakdown & Problem Framing
- Usability Testing

UI & Systems

- Wireframing (Low to High Fidelity)
- Responsive Visual Design
- Component Libraries & Variants
- Auto-Layout, Layout Grids, Tokens
- Design Systems (Foundations + Patterns)
- Prototyping (Mobile + Web)

Tools

- Figma, Fig Jam, Miro
- Notion
- ChatGPT, Claude, Gemini, Stitch, Midjourney, AI Plugins
- Basic Illustrator & Vectors

CERTIFICATIONS

- Basics of UI/UX Strategy- UniAthena x Cambridge International Qualifications (UK)
- Figma Bootcamp- LetsUpgrade
- GUVI Workshop: *Designing a digital Payment from Scratch.*

EDUCATION

B.Sc (Hons) Biotechnology
Manipal University Jaipur, Jaipur

2022-2025

ADDITIONAL

- Soft Skills: Communication, Structured thinking, Research documentation, problem solving, Collaboration
- Interests: Design systems, psychology, gamification, mobile-first design.

-
